FOR EFFECTIVE ADVERTISING SOLUTIONS

Digital products

Display advertising

MTV Oy offers diverse solutions for display advertising. MTV Oy's display inventory consists of the site MTVuutiset.fi, the MTV Uutiset app, and Assembly.org.

Advertisers only pay for viewable impressions. A viewable/inscreen ad complies with IAB Finland's standards: at least 50 % of the banner is on the user's browser for at least one second.

Large ad formats are an exception because they cover a large portion of the browser's area due to their size. According to the definition, no less than 30 % of the full size of large ad formats must be visible for at least one second. According to IAB Finland's definition, the size of a large ad format is no less than 242,500 pixels (applies to sizes 980x400px / 980x552px / 468x600px / 620x891px).

File types for display ads are .gif, .jpeg, .png, and HTML5.

Display ad placements 2023

Performance-based advertising - MTV Click

Performance-based advertising is tactical and has an objective, such as increasing visitor traffic on a website or boost the sales of an online store. The customer is invoiced based only on results, i.e. actual clicks. Brand safety settings in our services guarantee a safe advertising environment regardless of the purchasing method.

With an MTV Click campaign the remarkably wide reach of our websites is gained quickly and device-independently. By targeting locally, you can reach customers more specifically in a desired region. Content targeting is also possible in News, Sports, Entertainment, and Lifestyle.

There are no impression or click guarantees in performance-based advertising. Invoicing is done based on actual clicks during the campaign period. You define a maximum budget, which will not be exceeded. Campaign results are verified with MTV's advertising management system (Adform PPAS). Performance-based advertising utilizes all of MTV's display advertising placements and sites. The distribution includes mtvuutiset.fi (website and applications) and Assembly.org.

When planning an MTV Click campaign, please contact digitrafiikki@mtv.fi

Digital products

Outstream video advertising

MTV Uutiset Article video and MTV Uutiset Vertical video products are visible in the article content of MTVuutiset.fi, and most of the inventory is browser-based mobile and tablets.

Article video is a device-independent video ad format in which a muted video starts automatically when a user browses by the ad. The user can unmute the sounds at will.

Vertical video is a vertical mobile video ad format which starts automatically muted. The user can unmute the sounds at will. Most mobile consumption occurs when holding the phone vertically, and this ad format utilizes the whole screen of a mobile device.

The maximum duration of a video ad is 120 seconds, but we recommend using shorter ones (6–15 seconds) for maximum interest and impact. Since the video starts muted, we recommend using subtitles. Impressions are counted from the start of the video ad, and frequency control is based on browsers/devices (5/week).

Outstream video advertising, price list 2023

	MTV UUTISET ARTICLE VIDEO 16:9 €/CPM*	MTV UUTISET VERTICAL VIDEO, mobile 9:16 €/CPM*
ROS may include sex targeting or max. 10 exclusionary targeting tags without extra cost	13	18

Seasonal indexes for outstream video advertising

The index of an ad is determined by the program's broadcasting day.

PERIOD (DATE)	PERIOD (WEEK)	INDEX
2.-29.1.2023	1-4	70
30.1.-25.6.2023	5-25	100
26.6.-6.8.2023	26-31	80
7.8.-24.12.2023	32-51	100
25.-31.12.2023	52	80

MTV Oy reserves the right to change the seasonal indexes

Targeting options for display and outstream campaigns

1. MTV's own data

Interest data is based on article consumption of our visitors on various times. MTV's own data can be utilized in direct-buy display campaigns and programmatic deals.

2. Relevant Audience data

MTVuutiset.fi is among the largest data partners of Relevant Audience. Targeting based on Relevant Audience data can be used for targeting display direct buys. Examples of the content of data includes strong B2B and purchasing intention segments as well as segments based on hobbies and interests.

3. Regional targeting (IP region)

Regional targeting on MTVuutiset.fi is usually done for MTV3's viewing regions, but it can also be customized to meet the customer's regional needs. Regional targeting is often used when the advertiser wants to reach residents of surrounding neighborhoods, or when a chain store wants to personalize its offers to the clients of their various stores.

4. Content targeting (contextual targeting)

Content targeting is one of the most popular option that MTV offers. MTVuutiset.fi content targeting is usually done within main categories

Front page	Entertainment	Digital topics
News and weather	Lifestyle	Home
Sports	Cars	Makuja recipes

For targeting that is more specific than the main content categories, we also offer tag targeting based on various topics. Every article gets tagged under several topics by the news desk, which we can utilize in targeting advertising for any given topic excluding the ones marked under brand safety automation (e.g. homicides, airplane accidents). We can provide tailored tag targeting taking into account every advertiser's target groups.

Other targeting options

MTVuutiset.fi offers advertisers also targeting options familiar from other media

Native advertising and content marketing

Native advertising is one of the forms of content marketing. It refers to content produced from the perspective of commercial needs and that fits naturally in its publishing platform. Native advertising utilizes the methods of publishing or distribution media along with its narrative style, making the content a natural part of the media and hence making an impact on consumers.

Publication of the customer's content in a news media will also increase the credibility of the content, and included hyperlinks together with SEO improve the search engine performance of the customer's content and website. The content is distributed with a reader guarantee and an agreed number of impressions. Reader guarantee (CPR) refers to a browser having stayed in the article for at least 6 seconds. People who read the article will be retargeted afterwards on MTVuutiset.fi.

Native advertising is not hidden advertising. It must always be recognized as an advertisement. Marking the content as an advertisement is also in the customer's interest, since a company will profit from being recognized in connection with interesting, high quality content, which creates positive associations related to the company or the brand.

The Council for Mass Media in Finland (CMM) and IAB Finland have created instructions for the media on labeling native advertising on the Web, and the Finnish Transport and Communications Agency (Traficom) has instructed on labeling product placement in television.

Native advertising and content marketing, price list 2023

	READERS min. 6 sec in an article	IMPRESSION GUARANTEE	GROSS €	NATIVE GAME GROSS €
1 article	4 000	1 000 000	6 200	7 000

CPR (cost per reader) Price of one reader

Targeting options

By sections: Front page, News and weather, Sports, Entertainment, Lifestyle, Cars, Makuja recipes, Home

By regions: such as Helsinki, Espoo, Rovaniemi

Native games are a tool used in content marketing for activating users to participate or providing additional information on products or services.

Examples of native games include quizzes and votes used to enrich a native article. It also offers the opportunity to reward consumers with the customer's products or discount codes.

Specific considerations regarding native advertising

Native articles are primarily written for the readers of MTVuutiset.fi and they must comply with the laws, regulations, and good manners. A native article cannot be a ready press release, presentation of a product or company, direct marketing material, or an advertisement text. The editor in chief of MTVuutiset.fi is responsible for all of the content published on MTVuutiset.fi and has the right to decline to publish material that does not comply with the laws, regulations, or good manners or that has other shortcomings or problems.

Videos or links to the customer's website can be embedded in the article. The link of the article and its content are at the customer's disposal unless something else has separately been agreed.

MTV optimizes article promotions, and for this purpose several options for headlining can be used. The headlines are compared to find out which of them attracts readers the most.

A maximum of three updates to articles is permitted. Additional updates incur an hourly rate according to MTV's price list. If the customer wishes to change an already approved article, 50 % of the article's price shall be charged for the alteration. If the customer wishes an approved article to be rewritten, 75 % of a new article's price shall be charged.

Specific considerations regarding social media posts

- Social media posts are produced lightly using tools of mobile journalism
- Posts must suit the general content of the account used and address the target group
- A post cannot be simply a customer's advertisement
- The customer's own social media account will be tagged in the post according to the regulations of social media native advertising
- The customer must define a contact person if comments require the customer's participation. We recommend the customer to monitor the situation and participate in the discussions in the comment section.

Digital products

Programmatic buying - instream video

MTV's video products can be purchased programmatically through deals. For up-to-date information on programmatically supported devices and targeting options, please contact programmatic@mtv.fi.

MTV Video Premium

MTV Video Premium ads are shown on MTV Katsomo in connection with long and short form content, in preroll and midroll placements. We identify the users by their login, which enables us to provide diverse targeting options for all programmatically supported devices.

MTV Video Reach

MTV Video Reach offers extensive reach also for campaigns carried out programmatically. The ads are shown on short and long form content of MTV's own digital services (MTV Katsomo, MTVuutiset.fi, and the browser-based MTV Uutiset application) in preroll and midroll placements.

MTV Video Short

In MTV Video Short the ad distribution consists of the video content of MTVuutiset.fi and the MTV Uutiset browser-based app.
